It's a pleasure for us to announce the CISSPAT (Centro Italiano Studio e Sviluppo Psicoterapia a Breve Termine) will start with the **EUROPEAN ISTDP SPRING SCHOOL** in 2012: an *Immersion Course in Intensive Short-Term Dynamic Psychotherapy* held by Allan Abbass, M.D. one of the worldwide leading experts in ISTDP, exclusively in Europe with CISSPAT, Padua. Also attending Dr. Leone Baruh (CISSPAT teacher and Director of PIBD-E Master) and Dr. Alessandro Bargnani (manager and coordinator). The course is provided in English and fully translated into Italian.

Dr. Allan Abbass is currently Associate Professor, Director of Psychiatric Education and Director of the Centre for Emotions and Health at Dalhousie University in Halifax, Canada. His career is dedicated to the development of Habib Davanloo's ISTDP and the research on its efficacy. Known for the extraordinary clarity and depth of his teachings, Dr. Abbass holds classes, supervisions and ISTDP Workshops worldwide. His researches and contributions to the ISTDP are appreciated to the professionists and well known to those working with Short-Term Psychodynamic Psychotherapy.

The videotape-based course will focus on the ISTDP rapid psychodiagnostic assessment method across the broad spectrum of suitable patients.

The emphasis will be on detecting and handling the resistances which emerge. Intervention will focus on handling tactical defences, clarifying and challenging and head on colliding with major resistances.

Further Dr Abbass will show his approach to blocking projection, a much more rapid approach to what can be a treatment paralyzing resistance.
